

Amy Ouyang

Research Associate

Amy Ouyang is a Research Associate at MacroPolo, the Paulson Institute's think tank. In this role, Amy conducts in-depth research and analyzes the global energy transition and its intersection with the economy, technology, and industrial policy. She has written extensively on green hydrogen production and supply chains, as well as the nuclear energy renaissance, including advanced frontier technologies such as small modular reactors and nuclear fusion.

Prior to joining MacroPolo, she interned at a number of think tanks in DC, including the Wilson Center and the Center for Strategic and International Studies, where she focused on examining US-China relations and China's foreign policy agenda through the lens of the military, technology, and the economy. She also worked in a number of news outlets and broadcasting stations in Hong Kong and the US. Amy holds an MA in International Relations from Johns Hopkins University School of Advanced International Studies, an MS and a BS in Journalism from Northwestern University.
